Allowed Claims: 1-19.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a method of measuring dishing as claimed, specifically comprising generating a set of calibration data; measuring the height variation of a first feature on a substrate and correlating the height variation of the first feature with the calibration data as claimed.

Specifically, with respect to independent claim 14, none of the prior art alone or in combination disclose or teach of a method of producing a set of calibration data for comparing to the measured height variation of a first feature as claimed, specifically comprising providing at least one sample substrate having a plurality of first features having differing widths and exhibiting dishing, surrounded by a second feature, measuring the magnitude of the dishing of the plurality of the first features and relating the magnitude of dishing to at least one of the first feature widths and the profile shape of the first features.

Specifically, with respect to independent claim 17, none of the prior art alone or in combination disclose or teach of a method of measuring dishing in a first feature as claimed, specifically comprising measuring the height variation of a first feature

embedded in a second feature, to determine the profile shape of the first feature and comparing the height variation of the first feature with pre-generated calibration data that relates the magnitude of dishing to the profile shape of a first feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CITATION OF RELEVANT PRIOR ART

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson et al (U.S. 6,623,991 B2) is being cited herein to show a method, which can be used to measure dishing, but does not specifically disclose the calibration data or profile shape limitations of that of the claimed invention.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Choi whose telephone number is (703) 305-3100. The examiner can normally be reached on Monday-Friday from about 9:00 am to 6 pm.
